# GCSE

C300U20-1

518-C300U20-1

# MATHEMATICS – Component 2 Calculator-Allowed Mathematics FOUNDATION TIER

THURSDAY, 7 JUNE 2018

- MORNING
- 2 hours 15 minutes

## ADDITIONAL MATERIALS

A calculator will be required for this examination.

A ruler, protractor and a pair of compasses may be required.

## INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen.

You may use a pencil for graphs and diagrams only.

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer all the questions in the spaces provided.

If you run out of space, use the continuation page at the back of the booklet, taking care to number the question(s) correctly.

Take  $\pi$  as 3.14 or use the  $\pi$  button on your calculator.

## INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.

Unless stated, diagrams are not drawn to scale.

Scale drawing solutions will not be acceptable where you are asked to calculate.

The number of marks is given in brackets at the end of each question or part-question.

You are reminded of the need for good English and orderly, clear presentation in your answers.

### Formula list

2

#### Area and volume formulae

Where r is the radius of the sphere or cone, l is the slant height of a cone and h is the perpendicular height of a cone:

Curved surface area of a cone = 
$$\pi rl$$
  
Surface area of a sphere =  $4\pi r^2$   
Volume of a sphere =  $\frac{4}{3}\pi r^3$   
Volume of a cone =  $\frac{1}{3}\pi r^2 h$ 

### Kinematics formulae

Where *a* is constant acceleration, *u* is initial velocity, *v* is final velocity, *s* is displacement from the position when t = 0 and *t* is time taken:

v = u + at $s = ut + \frac{1}{2}at^{2}$  $v^{2} = u^{2} + 2as$

**22.** The tourist office in Trofenberg displays the snowfall data each month in a table. The table shows snowfall in Trofenberg for each day during January. Snowfall, s (cm) Number of days 1 0 ≤ *s* < 20 20 ≤ *s* < 40 8 9 40 *≤ s <* 60 60 ≤ *s* < 80 7 80 ≤ *s* < 100 6 (a) Calculate an estimate for the mean daily snowfall in Trofenberg for January. You must show all your working. [4] (b) There were 9 days when the snowfall was between 40 cm and 60 cm. On each of these days, the snowfall was actually between 57 cm and 59 cm. Explain why the estimate for the mean daily snowfall in January may still be fairly accurate. [1]
